

Press Release

Harris Technology ads *ELOoffice* to its product range

Sydney 01 December 2006.

Harris Technology has decided to add **ELOoffice** to its product range. With this addition Harris Technology follows the trend of Australian software resellers strengthening their range with one of the world's leading boxed document management systems.

Harris Technology tested *ELOoffice* and decided that the many features the software provides gives Harris Technology customers a true Document Management Solution they can afford.

The decision was taken due to *ELOoffice* providing not only good scanning, organising, PDF creation and sharing possibilities but also additional features such as encryption, version control, MYOB integration possibility or Fulltext database.

With 2 versions of *ELOoffice* the product gives individuals as well as workgroups of up to 10 people the entry level Document Management Solution they are looking for. Seamless scalability of ELO Digital products give Harris Technology business clientele the possibility to start using Document Management Systems and later expand to large scale systems without changing the DMS supplier.

A member of Coles Group Limited, **Harris Technology** is one of Australia's largest resellers of technology to small and medium businesses. The product range includes computers, displays, networking, storage, printing, accessories, servers, software, licensing and services, sold through multiple channels – 8 Business Centres, contact centres and online at ht.com.au.

ELO Digital Office is one of the world's leading developers of document management and enterprise content management systems. *ELOoffice* SME is available at \$149.00; the network *ELOoffice* Full Version sells at \$499.00. *ELOoffice* sold more than 60,000 copies in Europe last year alone.
