

PRESS RELEASE

ELO achieves VERS Compliance

ELO Digital Office, a leader in Document Management, Enterprise Content Management and Records Management achieves full VERS compliance.

Sydney – March 2010

ELO Digital Office has achieved full certification for one of Australia's most stringent Government Records Management standards - VERS (Victorian Electronics Records Strategy).

The Public Record Office Victoria (PROV) summarises VERS as following:

“VERS is a world-leading solution to the problem of capturing, managing and preserving electronic records. VERS is a framework of standards, guidance, training, consultancy and implementation projects, which is centred around the goal of reliably and authentically archiving electronic records.

“There are five certification areas in VERS” says **Rainer Krause**, Managing Director of ELO in Australia and New Zealand. “The ELO software essentially complied out of the box for the majority of hurdles. Only when our software had to create the VEO (VERS Encapsulated Object) we had to adjust to the specific requirements.

Going through the VERS certification process has been a very successful investment not only for the Australian ELO subsidiary. Even our overseas sister companies and Headquarters in Germany will benefit from this achievement. Our cost efficient ELO solution has finally broken into the Australian market, dominated by systems that are often expensive or cumbersome or both.”

PRESS RELEASE

PROV explains on their website:

“VERS is promoted globally and has been accepted and used by archival institutions, national and international Governments and local and global product vendors.”

Being VERS compliant marks another step for ELO Australia to become a credible force in EDRMS for various Government levels in Australia. After being contracted by the NSW Government this new certification will allow essentially all States and Territories to choose a modern system for their EDRMS needs.

Described as a truly cost efficient alternative to Government agencies ELO has - amongst others - been implemented at Taronga Zoo and Newcastle Airport.

“Our successful implementations at the Zoo and Newcastle Airport helped us to understand better the particular requirements for Australian Records Management and the leading role PROV has taken in the world of preserving knowledge for the future” adds **Rainer Krause**.

“Having achieved VERS compliance is a great honour for us and we will make sure that a first class solution is delivered to every Government agency in Australia that chooses ELO as their EDRMS. Like German, Hungarian, Czech and Indonesian Governments now another agency has given us their seal of approval” remarks **Karl-Heinz Mosbach**, CEO at ELO’s HQ in Germany. “All assessors and other staff at PROV have shown their deep knowledge in VERS and have supported our technical staff where possible; but at the end the product spoke for itself.”

PRESS RELEASE

ELO Digital Office

ELO Digital Office develops and distributes high performance software solutions for document management, digital archiving and workflow management. ELO Digital has undergone high growth, so that it now ranks as one of the world's leading ECM/DMS software developers. The company actively cultivates numerous technology partnerships with software and hardware providers including Microsoft, Hewlett-Packard, Sun Microsystems, Kyocera, Kodak and many more. The ELO product range fulfils all DMS/ECM system requirements and provides an ideal platform for efficient knowledge and information management.

ELO*professional* is a modular client-server based solution aimed at meeting the requirements of middle-sized companies. The final product in the range is ELO*enterprise*, which offers a high performance, platform independent, scalable high-end solution, particularly suitable for data centres and portal applications.

All of the products are compatible with one another and allow data transfer or updates to be carried out at any time. Due to the scalability of ELO Digital products they are utilised by a wide range of companies, of varying sizes and within numerous different sectors. Well known customers such as Taronga Zoo, Remondis, JR Richards & Sons, Newcastle Airport, TSCO, Lufthansa, BMW, Airbus, EADS, Airbus, Alcatel, Goodyear, Siemens or Mercedes Benz as well as various national and regional authorities underline the level of quality and innovation found in ELO products.
