

## **ELO Digital Office launches interface to Furnsoft**

Sydney, October 27<sup>th</sup>, 2008

ELO Digital Office – one of the world's leading developers of document management systems – launches its interface to Furnsoft.

Following the successful creation of the automated interface to MYOB ELO's certified Business Partner Converged IT has finished another groundbreaking link between two systems – ELOprofessional and Furnsoft.

Furnsoft has been developed specifically for the furniture and manufacturing industry and improves essentially all angles of the related business processes forging extra efficiencies, harness information; provide a better service for customers, and increase output and margins.

“Converged IT has created another masterpiece of technology solution around ELOprofessional”, confirms Rainer Krause – ELO's Australian Managing Director. “They – Converged IT – just have a comprehensive understanding of manufacturing processes, document management needs and customer requirements.”

Converged IT analysed a wide range of business processes in the furniture and manufacturing arena and connected them together creating an efficient, cost saving and easy-to-manage solution.

Toby Ackland – Managing Director of Converged IT said: “Whether a company uses Cabinet Vision , Benchfab, Stonefab, Ardis, Cut rite, Python, Salesforce , Outlook, MYOB, Attache, Quickbooks, AccPac, or Dynamics our ERP solution integrates with all of the above products and can control the product lines through the entire manufacturing process.”

He adds: “Furnsoft and ELO provide a comprehensive solution for ordering, purchasing, stock control, sales invoicing, damaged goods, deliveries, returns, capacity planning, tracking, offcuts, scheduling, maintenance, KPI and more!. The combination creates a 360 degree solution.”

The Furnsoft ERP system together with its interface to ELOprofessional is a unified system which will bring all processes into one basket.

Once the Furnsoft system is in place, all aspects of an organisation can work in harmony resulting in increased productivity and eliminating the need for multiple types of software.

Having a comprehensive ERP system and combining this with a leading document management system will reduce double entries and save time and prevent errors throughout the manufacturing process.

The combined system has been successful with furniture manufacturers, air conditioning distribution companies, logistics companies and a fire suppressant distribution company, requiring a legislative compliant solution.

### **ELO Digital Office**

ELO Digital Office develops and distributes high performance software solutions for document management, digital archiving and workflow management. ELO Digital has undergone high growth, so that it now ranks as one of the world's leading ECM/DMS software developers. The company actively cultivates numerous technology partnerships with software and hardware providers including Microsoft, Hewlett-Packard, Sun Microsystems, Kyocera, Kodak and many more. The ELO product range fulfils all DMS/ECM system requirements and provides an ideal platform for efficient knowledge and information management.

*ELOoffice* is the entry-level product for document management and archiving and is ideal for small offices or standalone workplaces.

*ELOprofessional* is a modular client-server based solution aimed at meeting the requirements of middle-sized companies. The final product in the range is *ELOenterprise*, which offers a high performance, platform independent, scalable high-end solution, particularly suitable for data centres and portal applications.

All of the products are compatible with one another and allow data transfer or updates to be carried out at any time. Due to the scalability of ELO Digital products they are utilised by a wide range of companies, of varying sizes and within numerous different sectors. Well known customers such as Lufthansa, BMW, Airbus, EADS, Airbus, Alcatel, Commerzbank, Greek National Bank, Goodyear, Siemens or Daimler Chrysler as well as various national and regional authorities underline the level of quality and innovation found in ELO products
